Manager appointed

THESIS Asset Management, the largest solicitor-linked asset manager in the UK, has announced the appointment of investment manager Sean Cavanagh.

Sean joins the Gatwick team and brings with him a depth of knowledge, experience and understanding of the asset management business. Sean has more than 25 years' experience in investment management and joins from financial planning firm Andersen Charnley where he managed private client portfolios invested on a multi-asset basis.

Sean has also worked at United Assurance Asset Management (now Royal London) Deutsche Bank and Thomas Miller where he managed portfolios of direct equities and managed funds including hedge funds, property and commodities. David Tyerman, managing director, said: "He will be a great asset to the Gatwick office. As Thesis develops ever more links to financial planners, Sean's own experience within the IFA industry in his previous role will help Thesis meet the business needs of such advisers."
